Juke.Monster

Have you ever been at a barbeque and wanted to change the soundtrack? Or on a roadtrip with friends and dying to choose your own music?

Instead of pestering your friend who has his phone plugged into speakers, you can now nominate your own songs right from your phone.
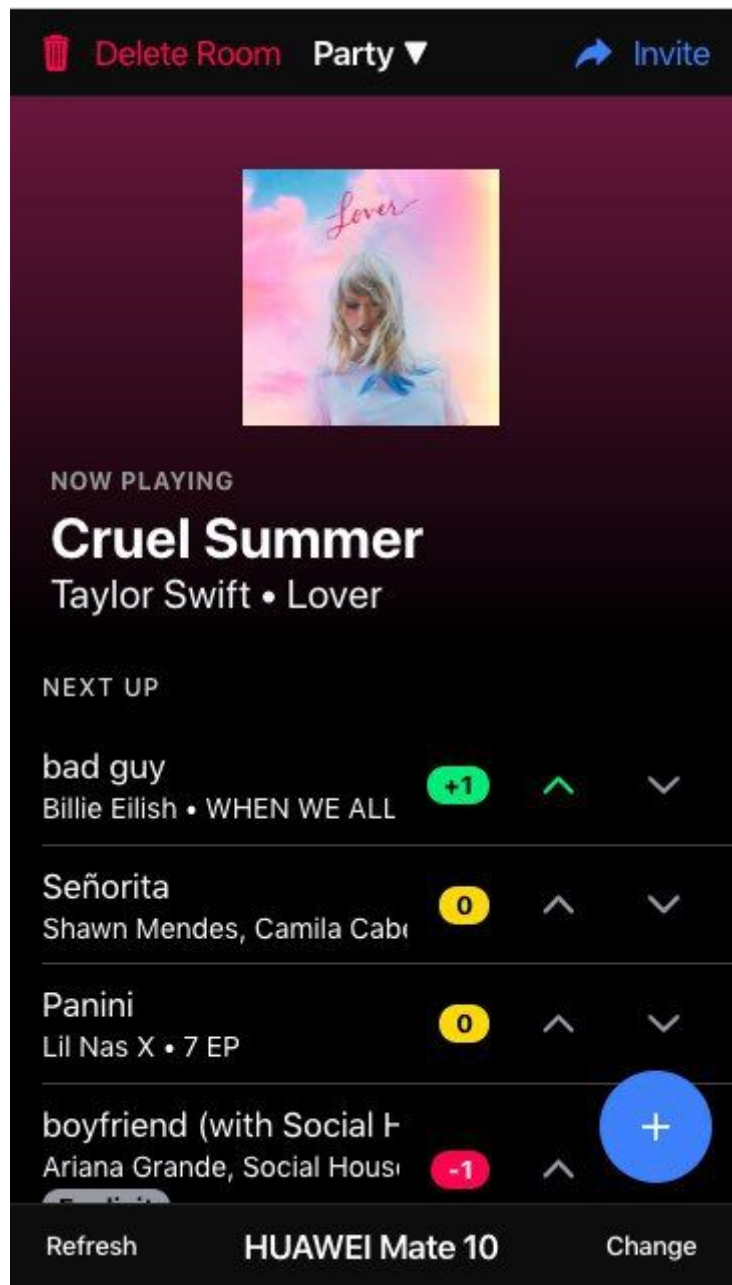

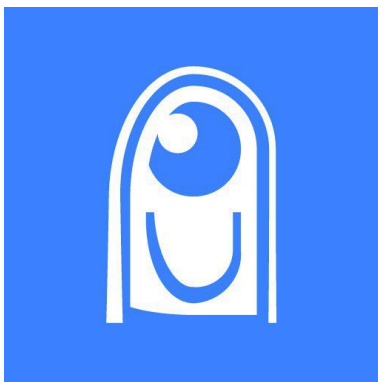

Introducing juke.monster, the best of its kind in the market.

As a party host, you can open a room with your premium spotify account and share it with your guests within a few taps.

As a guest, you can vote and nominate to influence the song queue.

Crowdsource the atmosphere for your next social gathering.

*We are making **jukeboxes cool again**. From historical artifacts to modern phones.*

Under the hood

Websockets are employed for **real time** crowdsourcing of song nominations and vote counts.

Room creation and sharing is **convenient** with native links and QR codes.

App fully utilizes spotify api wherever necessary for an **aesthetic visual** experience.

A progressive web application is an **ideal platform** for social activity lasting a few hours.

Rides on the **popularity of Spotify** and music streaming at social events without ownership of audio track
